

collaboration by design.

More flexible and adaptive work environments not only promote a collaborative culture, they are also linked to improvements in employee performance and health. Do people in your organization have what it takes to perform collaborative processes, tasks or project work at their best?

Introduction

Any company or organisation performs and competes most effectively on the condition of optimal internal collaboration. We benchmark your organisations' team collaboration tools and provide you with an effective cost-benefit analysis and recommendation.

It is our goal to enable people in organisations to work together, share knowledge and thus contribute to their best ability.

We accompany and help our clients by defining a strategic roadmap to develop and implement the most suitable toolkit for their collaborative needs.

Study in collaboration with the EPFL

The purpose of the study is to come to a benchmark and evaluation that expresses in simple terms how well an organisation rates in terms of availability and use of a wide variety of collaboration tools.

In the study we will also seek to find out if a significant relationship can be discovered between the business case and the use of such tools.

The results from the study will be completely anonymous so as to avoid any confidentiality issues and will express ratings along both qualitative and quantitative parameters.

For the study, different business functions in your organisation will be evaluated to understand the tools that are in place and used most. An evaluation will be made if the available toolkit is used properly to maximise the benefits for your people and the organisation as a whole.

How to participate

The collaborindex benchmarking study will be conducted in the 2014 – 2015 time frame within a wide variety of industries and organisations.

We will be contacting you shortly to discuss this initiative with you and to see if you want to give us your valuable support!

Should you wish to be proactive and contact us you can send us an email info@thecollaborationcompany.com or call us on **+41 (0)22 716 06 30**

Your benefits:

- Easily identify quick win areas and alternative solutions
- Understand training needs to increase user acceptance and increase job satisfaction
- Optimised budget allocation for future deployments and training.
- Organise user-group meetings to identify needs and evaluate modifications.
- Significantly improve data and knowledge sharing to create highly performing teams.

an initiative from:

is created from the insight that with the right understanding and use of collaboration technology, every company can benefit from enhanced competitive advantage and stronger more profitable growth.

Our **experience and knowledge of collaboration**, and supporting technologies can help you make the right choices for your organisation so you can start taking advantage from your chosen solution quickly.

To succeed today, companies need to improve their effectiveness and productivity whilst simultaneously reducing costs. This challenge requires them to capitalise on existing resources and expertise and minimise waste.

We can help you identify and implement the best collaboration technology for your needs.

the Collaboration Company is a trusted business partner of:

Academic Partners

For this study the Collaboration Company is looking to partner with 20 to 30 companies in the Lemman area, preferably with diversity in organisation size and industry. We would be very pleased to count your organisation amongst our partners.

Partner levels

The collaborindex review and benchmark encompasses a qualitative analysis of the tools that are used within the organisation as well as a quantitative (proxy) evaluation of the use that people within the organisation make of the tools..

Matrix partners receive a full review of their organisation and insight in their performance in comparison to the total peer group. Matrix partners also receive a roadmap with recommendations for the future as well as recommendations in areas where immediate improvements can be had at minimal effort.

Sponsorship contribution
matrix partner: Chf. 4'599,-

Line partners receive a comprehensive review of their organisation and insight in their performance in comparison to similar sized organisations within the peer group.

Line partners also receive a roadmap with recommendations for the future as well as recommendations in areas where immediate improvements can be had at minimal effort..

Sponsorship contribution
line partner: Chf. 3'999,-

Dot partners receive a comprehensive review of their of their organisation but no reference as to where they are situated in comparison to their peer group.

Sponsorship contribution
dot partner: Chf. 2'499,-
